- (a) Rate per 1,000 of mean population.
- (b) Population estimates for periods subsequent to the Census of 30th June, 1961, represent the population ascertained at the census plus natural increase and recorded net migration since that date. As complete records of interstate migration are not available the estimated population since 30th June, 1961, is approximate.
- (c) Includes natural increase and net migration. See also note (b).
- (d) Hobart and Suburbs.
- (e) Equivalent annual rates; based on too few events to warrant calculation to second place of decimals.

(a) Up to and including 1958 average rainfall for each year (represented by 100) is the average over the period 1911–1942. As from 1st January, 1959 a long period average from a selection of representative stations is used.

SEASONAL CONDITIONS, TASMANIA: JANUARY, 1966

Rainfall: During January, 1966, above normal falls were reported in only four local centres—Redpa, Mawbanna, Maydena and Maatsyker Island. Most of the State registered less than 40% of normal, but falls in the Western half ranged from 40% to 50% in the far north-west to 60%–90% elsewhere. The greater part of the East Coast recorded less than 30%, and no rain fell in a small area near Upper Scamander and St. Marys. For much of the Midlands falls were less than 10% of normal.

Temperatures: Mean temperatures were again above normal, except for a strip of the East Coast from St. Helens to Swansea and a section between Maydena and Bronte Park where negative departures were about 1.5°. Positive departures were mainly less than 2° except for scattered stations inland where departures were nearly 3°.

Rural Conditions: Cumulative rainfall deficiencies in all areas were increased by the below-normal January falls, and pastures deteriorated still further, with damage by army-worm infestations apparent throughout the State. Only in the extreme south-east were pastures considered in good condition. Frosts heavily damaged pea crops in parts of the north especially around Deloraine and Hagley. Fruit crop prospects appeared bright, although further rain was required for some varieties.
